An Enjoyable Time with Water

We insist that the spirit of craftsmen Must be consistent no matter in what era, and no matter how the technology changes.

This series of faucet demonstrates the intimate relationship between man and water. It adopts geometry columns as a fundamental design philosophy, whilst its ratio fits the golden cut accurately and beautifully. Meanwhile, the joints between every functional area connect seamlessly, creating a smooth and natural flow.

Its decisive outline implies typical men's resolution and perseverance, while the smooth corners are specially designed for comforts.
Just like fashionable men who care about both the environment and self-fulfillment, in the meantime, striving to balance sensibility and sensitivity.
